EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science and Engineering (Specialization in AIML)

- **GPA:** 8.9

Bhopal, MP

Expected 2027

PROJECTS

ImpACT | *MERN Stack, YOLOv8, NLP, MongoDB, Flask, Tailwind CSS*

Dec. 2025 – Mar. 2026

- Developed an AI-powered civic grievance management platform enabling citizens to report municipal issues through text, voice, and image inputs across 13 regional languages.
- Built multimodal AI pipelines using YOLOv8s and NLP models to automate complaint classification, severity prediction, and municipal issue detection with over 94% classification accuracy.
- Implemented geolocation-based automated ticket routing using MongoDB geospatial queries for real-time assignment to relevant municipal authorities.
- Designed scalable citizen and officer dashboards with real-time complaint tracking, multilingual support, and cloud-integrated media handling.

FinAssist AI | *Next.js, Python, LangChain, Vector DB, FastAPI, RAG*

July 2025 – Aug. 2025

- Engineered an enterprise-grade Retrieval-Augmented Generation (RAG) pipeline to ingest, parse, and extract contextual insights from dense financial and legal PDF documents.
- Implemented semantic retrieval workflows using state-of-the-art embedding models and vector databases to perform optimized similarity matching and minimize LLM hallucination rates.
- Integrated LangChain frameworks to orchestrate conversational agent memory, structured query routing, and deterministic prompt sequencing over complex financial datasets.
- Designed a high-throughput, asynchronous backend API to process multi-format document uploads and handle real-time streaming text generation securely.

SecureShield | *Chrome Extension, JavaScript, HTML/CSS, AES Encryption*

Jan. 2024 – Feb. 2024

- Developed a Chrome extension that detects and protects sensitive user information such as emails, phone numbers, addresses, and card details while browsing websites.
- Implemented real-time PII detection using pattern matching and DOM manipulation to identify exposed personal data.
- Integrated AES-based cryptographic masking and encryption to secure sensitive information before it could be shared with third-party websites.
- Built lightweight content scripts for efficient real-time scanning with minimal impact on browser performance.

FinTrack | *Next.js, Firebase, Chart.js, TypeScript*

Aug. 2024 – Nov. 2024

- Developed a personal finance tracking platform with real-time expense categorization and spending analytics.
- Built interactive dashboards and visualizations to monitor budgets, recurring expenses, and monthly financial trends.
- Implemented secure authentication and cloud-synced transaction management using Firebase services.
- Designed responsive UI components and optimized client-side rendering for improved user experience.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript, HTML/CSS, SQL

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Flask, LangChain, Tailwind CSS, Chart.js

Developer Tools & Databases: Git, GitHub, Docker, Firebase, MongoDB, Vector Databases, VS Code

AI & Machine Learning: Retrieval-Augmented Generation (RAG), YOLOv8, Natural Language Processing (NLP), PyTorch, scikit-learn, Pandas, NumPy, TensorFlow, Hugging Face Transformers

Cloud & DevOps: AWS (EC2, S3), Google Cloud Platform (GCP), GitHub Actions (CI/CD), Vercel, Supabase

LEADERSHIP & EXTRA-CURRICULAR

FYI (Future Young Innovators) Club

Core Team Member

VIT Bhopal University

July 2025 – Present

- Organize and lead campus-wide initiatives, workshops, and pitching events to foster business acumen, entrepreneurship, and startup culture among students.
- Mentor peers in refining business models, validating innovative concepts, and preparing pitch presentations.

Hackathon Competitor & Innovator

Active Participant

National Level

- Actively competed in prestigious national-level hackathons, including the Smart India Hackathon (SIH) and HealthHack, delivering high-impact, functional software prototypes within constrained timelines.
